Search Notes

Dear Examiner,

Attached are the search results (from commercial databases) for your case.

Tags mark the patent/articles, which might be of interest. After you review all records including tagged and untagged records, if you wish to order the complete text of any record, please submit request(s) directly to the STIC-EIC 2600 Email Box.

Please call if you have any questions or suggestions, and I have enclosed a Search Results Feedback Form to facilitate further comments or suggestions.

Thanks

Samir Patel

SEARCH REQUEST FORM

Scientific and Technical Information Center

Requester's Full Name JASON BORUNGHIAUS Examiner #: 80634 Date: 8/18/05
Art Unit: 3628 Phone Number X 2-6924 Serial Number: 09/833415
Location: 1000X 5B69 Results Format Preferred (circle): PAPER DISK E-MAIL

If more than one search is submitted, please prioritize searches in order of need.

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elements or structures; keywords, synonyms, acronyms; and registry numbers; and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: MIDI-ENABLED REAL-TIME MARKET INDICATOR

Inventors (please provide full names):

2001
Earliest Priority Filing Date: 4/21/04

For Sequence Searches Only Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.

MIDI KEYBOARD HOOKED UP TO STOCK ANALYSIS PROGRAM
PLAYS HI-PITCH TONE FOR BETTER PERFORMANCE

LOWER-PITCH TONE FOR WORST PERFORMANCE

INTENDED FOR BLIND USERS

MAPS PERFORMANCE TO A TONE

→ Use assistive (an) technology

Voluntary Results Feedback Form

➤ I am an examiner in Workgroup: Example: 2630

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

Comments:

**Dimpled Aluminum Interior Floors for Interior Sound Reduction in
Shinkansen Train Cars**
...ABSTRACT: train) cars and were adopted in the new Kyushu Shinkansen 800
series trains. Floor-related sound reduction was increased
markedly over conventional floors by using a double wall structure
consisting of an upper plate and a dimpled lower plate. This
structure decreased the sound radiation ratio of the upper plate.
Moreover, the rigidity and strength of the floor was maintained,
without affecting sound reduction performance, as the many dimples
on the lower plate support the upper plate. (author abst.)

When Money Talks, Orwell Is Listening

Norris, Floyd

New York Times, Sec 4, p 2, col 5

Apr 6, 1997

ISSN: 0362-4331 NEWSPAPER CODE: NY

DOCUMENT TYPE: News; Newspaper

LANGUAGE: English RECORD TYPE: ABSTRACT

LENGTH: Medium (6-18 col inches)

ABSTRACT: AS **stock** prices tumbled last week, serious discussion erupted as to whether things were really getting better...

...use words to mean what they usually mean. The question being asked was whether a **stock** market 'correction' had begun. And certainly, no one would oppose having things corrected. Why call...

...it is part of a trend, which has been going on for decades, to make **bad** economic and financial news **sound** as **good** as one possibly can.

Politicians are happy to get in on that trend. So are...

...their job to sell securities. And that job is not made any easier if things **sound** too **bad**. On a daily basis, the favored terms of Wall Street make any **stock** market movement **sound good**. Sometimes there is a 'rally,' which means prices are rising. Other days see 'profit taking,' which means prices are falling because so many people were selling **stocks**, but it **sounds** so **good**. Sometimes the phrase profit taking is used even when a **stock** has fallen so far that it is inconceivable that any living person has any profits...

S&P 500 Index, Barring Late Rise, May Drum a Lower Beat for 1999
Browning, E S

Wall Street Journal, Sec C, p 1, col 3

Oct 4, 1999

ISSN: 0099-9660

NEWSPAPER CODE: WSJ

DOCUMENT TYPE: News; Newspaper

LANGUAGE: English RECORD TYPE: ABSTRACT

LENGTH: Long (18+ col inches)

ABSTRACT: The soaring S&P hasn't just helped pull investor money into the **stock** market. As the years have gone by, the gains have persuaded many investors to move billions of dollars out of individual **stocks** and traditional mutual funds, and into so-called index funds that simply duplicate the S&P 500's return. Who was greedy? A return of 20% to 30% a year **sounded good** to many people. **Stock** traders and mutual-fund managers say less money is moving into **stocks** and **stock** funds this year than in past years. **Stock** -trading volumes are lower than earlier in the year, when **stocks** still were flying. People are losing their euphoria, and expectations of strong **stock gains** are fading. The gloom can become self-fulfilling: The less new money people put into **stocks**, the less **stock** prices rise. Many analysts now believe that, despite recent indications of economic strength, tame inflation...

...would be little more than saber-rattling, it would leave a cloud hanging over both **stocks** and bonds. Many on Wall Street think that kind of uncertainty is just what Fed Chairman Alan Greenspan wants, because it would hold a lid on the **stock** market, without requiring an actual rise in interest rates.

The Components of Sound Financial Management.

Grayson, Ernest C.

9pp.

February 20, 1976 (19760220)

NOTES: Speech presented at the Annual Convention of the American Association of School Administrators (108th, Atlantic City, February 20-23, 1976)

...businesslike way. Without sound financial management, the best instructional program will fail. Several components make **up** a **sound** program of financial management. Resources are basic, and these vary from district to district. Before...

...sure that all available resources have been fully utilized. Enrollment must also be considered. Without **good** data about expected enrollment, **sound** financial management is impossible. Another important component is staffing. Staffing a school system is a...

...vital is a careful followup to ensure that various departments stay within their budgets. Federal **funds** are available, of course, but qualifying for federal money is a mixed blessing if a school system goes broke in the process. In conclusion, **sound** financial management can be summed **up** in one word--responsibility. (Author/JG)

BELLOWS BODY FOR CONNECTING ROLLING **STOCK**

ABSTRACT

PROBLEM TO BE SOLVED: To provide a bellows body for connecting rolling **stock** capable of **increasing sound** absorption and **sound** insulation effects, **reducing** the influence of noise on the environment in the rolling **stock** when the rolling **stock** runs, dispensing with an opening and closing door for going in and out in the rolling **stock**, and increasing energy saving effect for thermal insulation.
SOLUTION: In this bellows body for connecting rolling **stock** constituted such that awning bows 3 are inserted between both inside and outside bellows sheets...

Paper making stock , for making tissue...
...dendrimeric polymer for increasing retention of fines, fillers,
dispersed hydrophobic particles and cellulosic fibres, and decreasing
pitch
 ...Abstract (Basic): Paper making **stock** comprises an aqueous paper
 forming cellulosic dispersion of paper making components comprising
 cellulosic paper making...
 ...paper making aid (claimed) to enhance retention of components in a
 cellulosic fibre sheet. The **stock** can be used to make any grade of
 paper including news print, board, tissue and...
 ...ADVANTAGE - The dendrimeric polymer retention aid **increases** retention,
 improves drainage and **decreases pitch** and/or stickies deposition
 during manufacture of paper or paper board in closed, highly
 contaminated...
 ...Title Terms: **STOCK** ;

... involves flocculating a thick stock using a high mol. wt., low cationic charge density polymer

...Abstract (Basic): Prodn. of paper comprises: (1) forming a thick **stock** cellulosic suspension having a solids content of at least 2.5 wt.%, from a thick **stock** component cellulosic suspension(s) having a solids content of at least 2.5 wt.%; (2) flocculating the thick **stock** by adding to the **stock** or a component(s) of the **stock**, a synthetic water soluble first polymeric material having a theoretical cationic charge density of <3...

...and an intrinsic viscosity of at least 4 dl/g; (3) diluting the flocculated thick **stock** to form a thin **stock** having a solids content of 2 wt.% or less; (4) draining the thin **stock** through a screen to form a sheet; and (5) drying the sheet...

...ADVANTAGE - The process gives good retention and drainage and drying properties accompanied by **good** formation. It can **reduce pitch** problems without damaging the brightness of the sheet...

...Abstract (Equivalent): forming a thick **stock** cellulosic suspension having a solids content of at least 2.5% by weight from at least one thick **stock** component cellulosic suspension having a solids content of at least 2.5% by weight...

...flocculating the thick **stock** by adding to the thick **stock** or to at least one thick **stock** component suspension a synthetic, water soluble, first, polymeric material having a theoretical cationic charge density...

...diluting the flocculated thick **stock** to form a thin **stock** having a solids content of not more than 2% by weight...

...draining the thin **stock** through a screen to form a sheet...

...and drying the sheet, where a coagulant is added to the thin **stock** before drainage...

...anionic colloidal material is added to the thin **stock** after the coagulant and before drainage...

February 22, 1989 (19890222)

ABSTRACT

... a bonding range by one feeding are fed to the bonding stage by a constant **pitch** feeding, and positional **changes** .delta.1(sub 11)-.delta.1(sub 14) due to the thermal deformation of the...

... the heating experiment of a sample lead frame. The units 15-19 are automatically wire **bonded** on the basis of the **changes** .delta.1(sub 11)-.delta.1(sub 14) confirmed by the sample lead frame.

Patent Details:

Patent No	Kind	Lan Pg	Main IPC	Filing Notes
CN 1598741	A		G06F-003/023	

Abstract (Basic):

... The invention discloses a keyboard of Chinese characters rapid type-in machine, it **changes** the current ' **tone** + rhyme + **tone** + rhyme' style of Chinese character type-in (each hand controls an area), into four characters...
...additionally, it can be used to type-in long word, and it has large word- **stock** , so it becomes a rapid and simple Chinese character type-in method.

...SPECIFICATION materials are described in more detail below.

Although the invention has the advantage of permitting **reduction** in **pitch** problems, it should be understood that the preferred aspects of the invention are aimed at achieving **good** formation and retention irrespective of **pitch** problems and are, in particular, processes (d), or preferably (e) above. Thus in such processes the thick **stock** may be a material which does not require this pitch fixative addition. For instance the thick **stock** may have been made from clean **stock** components having **low** tendency to deposit **pitch** or other components which will act as pitch fixatives may be included in the thick **stock**. For instance cationic starch or conventional **low** molecular weight, high cationic, polymeric **pitch** fixatives may be included in a dirty thick **stock** or thick **stock** component such that the thick **stock** does not suffer from significant pitch deposition problems.

When pitch problems do not dominate the...

...SPECIFICATION Flow proceeds over the top of a weir and down a sloped screen, with thickened **stock** being retained on the top of the screen and dropping into the feed tank of...

...screw of the press is surrounded by a self-cleaning perforated screen. The combination of **decreasing** screw **pitch** and **increasing** shaft diameter **increases** pressure along the shaft axis, forcing liquid through the screen. The final consistency is about 35-40%, and the **stock** is passed to a silo for storage.

Example 2

Recycled pulp derived from OCC was...

...SPECIFICATION materials are described in more detail below.

Although the invention has the advantage of permitting **reduction** in **pitch** problems, it should be understood that the preferred aspects of the invention are aimed at achieving **good** formation and retention irrespective of **pitch** problems and are, in particular, processes (d), or preferably (e) above. Thus in such processes the thick **stock** may be a material which does not require this pitch fixative addition. For instance the thick **stock** may have been made from clean **stock** components having **low** tendency to deposit **pitch** or other components which will act as pitch fixatives may be included in the thick **stock**. For instance cationic starch or conventional **low** molecular weight, high cationic, polymeric **pitch** fixatives may be included in a dirty thick **stock** or thick **stock** component such that the thick **stock** does not suffer from significant pitch deposition problems.

When pitch problems do not dominate the...

...SPECIFICATION graphite stock to be impregnated with a suitable impregnant such as a polymer resin or **pitch** to **decrease** its porosity and **increase** strength. Resins are subject to certain inherent disadvantages in that in general, they have high...

...liquid suitable for impregnation. It is also conventional to preheat the carbon or graphite electrode **stock** to an elevated temperature before adding the pitch impregnant. The electrode is then cooled to...

...cured.

Detailed Description of the Preferred Embodiment

Carbon and graphite electrodes are generally impregnated with **pitch** to **increase** strength and density. The impregnation must be carried out at a high temperature in order to melt the **pitch** and achieve a **low** viscosity. Moreover, the **pitch** impregnant tends to run out of the electrode **stock** during rebake and causes disposal problems. It has been discovered that a pitch with a...

...rebake operation. This causes a substantially higher carbon yield and does not require the impregnated **stock** to be baked at a slow rate.

In general, the impregnant of the present invention...

...SPECIFICATION of insulation material.

Difficulties in maintaining the pitch or center-line spacing of terminals has **been** encountered with **increasing** connector miniaturization. Difficulties in **pitch** control arise **because** of the inherent physical **properties** of the inter-terminal dielectric material of which the housings are made. For example, it...

...that many plastics tend to swell somewhat with increasing humidity. Also, thicknesses of the metal **stock** from which terminals are formed can vary **slightly** from terminal to terminal. These and other like processes tend to deteriorate the dimensional tolerance of connector assemblies. Nonetheless, there is an **increasing** need to **reduce** the **pitch** or centerline **spacing** of electrical **connector** assemblies, **including** not only assemblies mounted on a printed circuit board, but also the connector assemblies found...

Detailed Description

Detailed Description

... be added as a result of, for instance,
recycling waste paper that includes polymeric binder.

Pitch dispersants are **low** molecular anionic compounds that keep the pitch in dispersion. In view of the increasing tendency to recycle the drainage white water, this can lead to an unacceptable build **up** of dispersed **pitch** in the white water, It is therefore more common to include pitch fixatives or runnability is sometimes added to the thick **stock** for this purpose, The use of a low molecular weight polymer in combination with bentonite...

...polymers of DADMAC at various positions. Some such disclosures mention adding polymers to the thick **stock** wherein the polymers can fall within a wide range of molecular weights and cationic charge...materials are described in more detail below,

Although the invention has the advantage of permitting **reduction** in **pitch** problems, it should be understood that the preferred aspects of the invention are aimed at achieving **good** formation and retention irrespective of **pitch** problems and are, in particular, processes (d), or preferably (e) above. Thus in such processes the thick **stock** may be a material which does not require this pitch fixative addition. For instance the thick **stock** may have been made from clean **stock** components having **low** tendency to deposit **pitch** or other components which will act as pitch fixatives may be included in the thick **stock**. For instance cationic starch or conventional **low** molecular weight, high cationic, polymeric **pitch** fixatives may be included in a dirty thick **stock** or thick **stock** component such that the thick **stock** does not suffer from significant pitch deposition problems.

When pitch problems do not dominate the...

Detailed Description

Detailed Description

... 0016] The prior art also teaches that certain chemicals can be used in
combination to **decrease pitch** deposition while **increasing pitch**
retention. Nguyen (U.S. Pat. No.

5,723,021) disclosed that a combination of polyvinyl alcohol, a high
molecular weight gelatin, and a cationic polymer gave **decreased**
deposition and **increase** retention of **pitch** in a paper process system.

SUMMARY OF THE INVENTION

[0017] It has been found that...

...least one of the pulps is contains contaminates.

The combinations may be added to the **stock** at any point prior to the
manifestation of the deposition problem and at more than...

...with the present invention as compared to prior processes. These
advantages include an ability to **decrease pitch** deposition while

increasing retention of **pitch** on the fiber, an ability to function without being greatly affected by hardness of the...

CARBON COMPOSITES

KOHLENSTOFFVERBUNDWERKSTOFFE

COMPOSITES EN CARBONE

PATENT ASSIGNEE:

MATERIALS AND ELECTROCHEMICAL RESEARCH (MER) CORPORATION, (1770682), 7960
South Kolb Road, Tucson, AZ 85706, (US), (Proprietor designated states:
all)

INVENTOR:

LOUTFY, Raouf, 6507 N. Ventana Canyon, Tucson, AZ 85715, (US)
WITHERS, James, C., 7261 E. Ventana Canyon, Tucson, AZ 85715, (US)
BRUCE, Calvin, 2523 N. Placita De La Lantana, Tucson, AZ 85715, (US)
KOWBEL, Withold, 8880 E. Broadway 146, Tucson, AZ 85710, (US)
VAIDYANATHAN, Ranji, 830 S. Calle de Sol, Tucson, AZ 85715, (US)

LEGAL REPRESENTATIVE:

Tollett, Ian et al (86292), Williams Powell Morley House 26-30 Holborn
Viaduct, London EC1A 2BP, (GB)

PATENT (CC, No, Kind, Date): EP 991610 A1 000412 (Basic)
EP 991610 B1 041215
WO 1998058888 981230

APPLICATION (CC, No, Date): EP 98930473 980620; WO 98US13053 980620

PRIORITY (CC, No, Date): US 50715 P 970624; US 7573 980115

DESIGNATED STATES: DE; FR; GB; IT; SE

INTERNATIONAL PATENT CLASS: C04B-035/83; F02F-007/00

Electrophotographic photoreceptor

Elektrophotographischer Photorezeptor

Photorecepteur electrophotographique

PATENT ASSIGNEE:

MATSUSHITA ELECTRIC WORKS, LTD., (303450), 1048, Oaza-Kadoma, Kadoma-shi
Osaka 571, (JP), (Proprietor designated states: all)

INVENTOR:

Yamaki, Takeyuki, 3-3-58-206, Ikeda, Neyagawa-shi, Osaka, (JP)

Inoue, Minoru, 4-33-8, Kisabe, Katano-shi, Osaka, (JP)

LEGAL REPRESENTATIVE:

Leson, Thomas Johannes Alois, Dipl.-Ing. et al (78981), Patentanwalte
Tiedtke-Buhling-Kinne & Partner, Bavariaring 4, 80336 Munchen, (DE)

PATENT (CC, No, Kind, Date): EP 855625 A1 980729 (Basic)
